The amount of people leaving negative reviews just because they couldn't get the game to work saddens me. Not only are they needlessly dragging down the score of a great game, they're also missing out on a great experience. That said, this game isn't for

---

everyone. If you're considering getting this after playing Hearts of Iron 4, I would advise against it. HoI4 is much more simple, but it also allows more freedom with countries, allowing you to play more as well as turn any country into a proper player on the world stage. HoI3 is a lot more brutal and realistic in that regard, so if your country starts off terribly, chances are it'll stay that way. Don't expect to be able to change the world as Cuba or Liberia, but when WW2 inevitably happens there's nothing stopping you from picking a faction and sending some troops to the front. But, if you thought HoI4 was lacking in combat (because hoIu2665u2665u2665u2665u2665it is), then HoI3 is the game for you. There's a lot more nuance and micromanagement to be had, but if grand scale war simulators are your thing then you'll be right at home. There's no battle planner that does all your work for you, it's just you manually commanding anywhere from a few dozen to a few hundred units down to the division level. It's difficult, but rewarding. And if what the base game offers you doesn't cut it, there are plenty of mods as well. The modding scene is mostly dead, but it's produced a few gems, and the lack of updates for the game means they'll never become outdated. In particular I would recommend: WW1 Mod - obviously Historical Plausibility Mod - More decisions and events, both historical and ahistorical for a richer experience overall Modern Warfare Mod - Unfinished and dead, but still good for the latest version of the game, and has a lot of content as-is.. The game is vastly superior than its descendant HOI IV by a large margin in terms of AI intelligence, troop management, and the overall difficulty it gives. Now if only the devs put the same AI intelligence in HOI IV combined with its graphic, then my life would be much better.. With Black Ice, one of the best HoI, far better than HoI 4 , the only problem, a bit too much bugs, if they took their inspiration from HoI 3 BI, the fourth of the name would have been a masterpiece !. I so far really like this game. but I'm wondering how to actually attack people, because I am currently playing as germany during ww2 and I keep losing battles against them.. If you need to pause in HOI4, don't buy this game. I'd really like to play this game more, but on windows 10 (for me) it's a buggy unplayable mess.
